WHO ARE WE?

Ignited in **February 2005** by the pioneering spirit of **Mr. Sujeewa Liyanaratne**, Techno Instruments (Pvt) Ltd stands at the forefront of innovation.

We meticulously address critical analysis demands across the vital realms of **Life Science & Chemical Analysis**, as well as the **Electrical & Electronics** sector. As the exclusive **authorized distributor for Agilent Technologies Inc. in Sri Lanka**, we transcend mere product provision, delivering unparalleled solutions, dedicated services, comprehensive training, and steadfast support. By forging alliances with world-leading companies, we relentlessly equip our clients with cutting-edge technology, driving heightened professionalism and efficiency, and ultimately, accelerating their journey towards groundbreaking achievements.

“

With over two decades of service, Techno Instruments (Pvt) Ltd has built its foundation on precision, innovation, and trust. Our focus on life science and chemical analysis, along with electronic test and measurement, has played a vital role in supporting research, industry, and education across the region.

Our strength lies in a skilled and dedicated team, continuous learning, and a deep commitment to delivering value-driven, technically sound solutions.

Looking ahead, we are excited to expand our global footprint and continue our journey of innovation—empowering progress through reliable solutions that meet the evolving needs of a connected and advancing world.

Mr. Sujeewa Liyanarathne

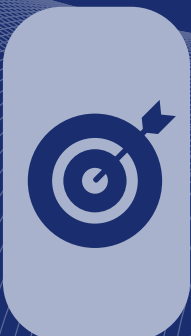

Director / Chemical Analysis Group

”

OUR VISION

To boldly advance professionalism and meticulously elevate efficiency across industries, thereby making indelible contributions to national development through the deployment of technologically superior, perfectly tailored solutions.

OUR MISSION

To steadfastly stand as Sri Lanka's most innovative, cost-effective, and deeply knowledgeable vanguard, delivering cutting-edge equipment and transformative solutions in Life Sciences, Chemical Analysis, and Test & Measurement. Our unwavering commitment extends to delighting every customer through unparalleled training and steadfast after-sales service, forging enduring partnerships.

SOLUTION SELLING

At Techno Instruments, we don't just supply equipment; we architect comprehensive solutions that empower critical advancements across diverse sectors. We stand as your dedicated partner in precision, offering unparalleled expertise in two pivotal domains:

LIFE SCIENCE & CHEMICAL ANALYSIS SOLUTIONS

1 We equip researchers, scientists, and industries with sophisticated tools to explore the very essence of matter.

2 Our solutions span from fundamental academia and cutting-edge scientific research to vital applications in environmental protection, food safety, and forensic analysis.

3 From the pharmaceutical lab to semiconductor manufacturing, we empower breakthroughs in genomics, proteomics, and advanced materials research, ensuring precision in every discovery.

4 Our expertise ensures reliable data for pivotal decisions, pushing the boundaries of scientific understanding.

5 We enable seamless integration of analytical technologies into complex workflows, driving efficiency and confidence across every stage of research and production.

ELECTRONIC & TELECOMMUNICATION SOLUTIONS

1 In the dynamic world of electronics and telecommunications, we deliver essential measurement capabilities shaping the future.

2 Our advanced solutions span the full spectrum of electrical and electronic signals, from direct current to light wave.

3 We provide critical precision for aerospace, defense, high-speed digital design, and robust RF & Microwave applications.

4 For communications, we are pivotal, enabling development and testing of cellular technologies (including 5G), wireless, and advanced optical networks.

5 Our offerings also include precision time distribution, network/cable testing, and specialized engineering training systems, ensuring vital infrastructure's integrity.

OUR GROUNDBREAKING ACHIEVEMENTS

OUR PRODUCT ECOSYSTEM

GAS CHROMATOGRAPHY

GC/MSD

Triple Quadrupole
GC/MS

GC/Q-TOF

LIQUID CHROMATOGRAPHY

Single Quadrupole
LC/MS

Triple Quadrupole
LC/MS

LC/MS Q-TOF

ATOMIC SPECTROSCOPY

AAS

MP-AES

ICP-OES

ICP-MS/ICP-MSMS

Standards

MOLECULAR SPECTROSCOPY

Fluorescence Spectroscopy

FTIR

Raman

LDIR

UV-Vis & UV-Vis-NIR

COLUMNS & SAMPLE PREPARATION

LC & GC Columns

SPE

QuEChERS

Sample Filtration

SLE

VACUUM TECHNOLOGIES

Ion Pumps & Controllers
Turbo Pumps & Controllers
Dry Scroll Pumps
Leak Detectors

LABORATORY WATER PURIFICATION

Ultrapure Water Purification System Type 1/ Type 1+

ELECTRONIC TEST AND MEASUREMENT

Oscilloscopes

Analyzers

Meters

Generators, Sources and Power Supplies

Software Solutions

UNWAVERING SUPPORT, ENDURING PARTNERSHIP

At Techno Instruments, our commitment to your success extends far beyond the moment of purchase. We believe true partnership flourishes through dedicated support, ensuring your investments deliver lasting value and performance.

Beyond the Transaction:

Our relationship with you is designed for longevity, built on the principle of continuous support and mutual growth.

Expert Guardianship:

Our meticulously selected and highly trained experts skillfully master and support sophisticated equipment.

Reliable & Responsive:

We pledge a reliable after-sales service that delights our customers and strengthens relationships.

AFTER-SALES SERVICES

Local Inventory Advantage:

Our strategic local inventory in Sri Lanka guarantees prompt, efficient support, precisely when needed.

Empowering Through Training:

We offer comprehensive training and services, empowering you to fully harness solution potential.

Solution Enriched Support:

Our support is enriched with deep technical insight, ensuring you always receive the right solution, tailored to your needs.

SOUTH ASIA CENTER OF EXCELLENCE (SACOE)

Established in 2017 as a state-of-the-art demonstration laboratory facility in Kalubowila, the SACOE stands as **a beacon of learning and practical application**. It is more than a laboratory; it is a dynamic hub where our customers can directly engage with and **experience cutting-edge instruments**.

Experiential Learning:

A dedicated laboratory environment designed for hands-on interaction, allowing customers to directly experience the capabilities of advanced instrumentation.

Modern Technical Know-How:

Providing access to the latest theoretical and practical knowledge, bridging the gap between innovation and application.

Customized Training Sessions:

Tailored educational programs designed to enhance expertise, ensuring proficiency and confidence in using sophisticated equipment.

Live Sample Analysis Demonstrations:

Witnessing real-time analysis to understand instrument performance and practical applications across various disciplines.

Flexible Equipment Rental Services:

Offering convenient access to specialized equipment for short-term needs, supporting diverse project requirements without upfront investment.
